DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 7/12/10 have been fully considered but they are not persuasive. With respect to applicant's argument against the new matter of claim 57, nowhere in the original specification that recites the equivalent between the languages "shaft" is equivalent of "cantilevered rod." Therefore, the rejection is maintained.

Response to Amendment

2. The amendment filed 7/12/10 has added claims 62-64; however, these claims are directed toward a non-elected species. Therefore, claims 62-64 are hereby withdrawn from further consideration.

Drawings

3. Figure 16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 57-61 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. While the original specification discusses the roller ball having a surface roughness depending on the consistency of the product to be dispensed, nowhere does it teaches the "cantilevered rod" in line 2 of claim 57 is also considered as new matter since it is not presented in the original specification. The claims are being examined as best understood.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-27, 29, 40-49, 52, 55 and 57-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,897,626 (hereinafter Bratby-Carey) in view of US Patent 2,663,891 (hereinafter Hanryon) and US Patent 6,276,856 (hereinafter Pieper) as set forth in the previous office action.

The added language of "said first roller ball having a surface roughness calibrated for optimal delivery of said product, said surface roughness being determined according to said product's viscosity" is considered as mere manufacturing calculation.

Every single, workable, rollerball applicator would obviously have a roller ball having a surface roughness calibrated for optimal delivery of the product since they are manufactured to dispense the liquid product of a device wherein the liquid product would obviously have a viscosity.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
